

Dear Sir/Madam,

I want to apply to fill in the **DevOps Engineer** position at your association. My experience adjusts well to the capabilities you are looking for and I am certain that I would make a valuable addition to your organization.

I have finished my undergrad in software engineering from **Lovely Professional University** and furthermore, I am **AWS Certified DevOps** at **Professional** level, **AWS Certified Solutions Architect**, **AWS Certified Developer** and **AWS Certified SysOps Administrator** at **Associate level** along other related certifications. I am right now working at Flux7 as DevOps Engineer. I have 2.5+ years of experience in DevOps field which has provided me with a well-rounded skill set, including second to none problem solving and organizational abilities, I stand out at:

- Breaking down a problem to the core components and solve them in an efficient manner.
- Building tested and stable software while maintaining its quality.
- Working as a team to foster growth and ideas.

My day to day duties include automation, testing, solution analysis, manage, improve & monitor cloud infrastructure and so on. In addition to educational and professional qualities, I have strong passion about technology. I am a methodical, focused and quick learner. When given a problem, I strive to bring the best and most optimized solution.

I am extremely enthusiastic about software development and working with professionals in this field would be dream come true. Hence, I would welcome an opportunity to contribute to your development. Please review my attached CV for additional details regarding my expertise and career achievements.

Thank You for your time and consideration.

Sincerely,
Praveen Kumar
